

3D Pumpkin Craft

by **Caroline** last updated: updated 8 months ago

We made our craft with three paper pumpkins in a row. There are so many ways you can customize the craft project though.

You can fill a whole sheet of paper with 3D pumpkins to look like a pumpkin patch. Or fold a half sheet of paper in half to create a card and glue a pumpkin on the front to create a fall themed greeting card for a friend or family member.

Supplies needed to make this 3D paper pumpkin craft:

- Pumpkin templates on orange cardstock
- Small piece of brown construction paper
- Half sheet of kraft paper thin cardboard
- Green pipecleaner
- Glue stick
- Tape
- Scissors

Instructions for making your 3D pumpkins:

1. Print out paper pumpkins craft template

Each page of the template has two paper pumpkins on it. One page of the template has a smaller pumpkin shape and the other has one a bit larger. You can mix the two together and create as many pumpkins as you would like. You can color on the paper if you'd like to vary the way your pumpkins will look.

2. Cut template down the middle and fold each half

Cut the template down the middle along the dashed line where indicated. Then fold each half along the dashed line of the sheet of paper where indicated on the template.

3. Cut out pumpkin shapes from template and create 3D pumpkins

Cut out all three of the folded pumpkin shapes from the template. Use your glue stick to add glue to one of the folded paper pumpkin halves. Then glue another folded pumpkin onto it. Add glue again and glue the third paper pumpkin half onto it. This creates the 3D pumpkin shape for your craft.

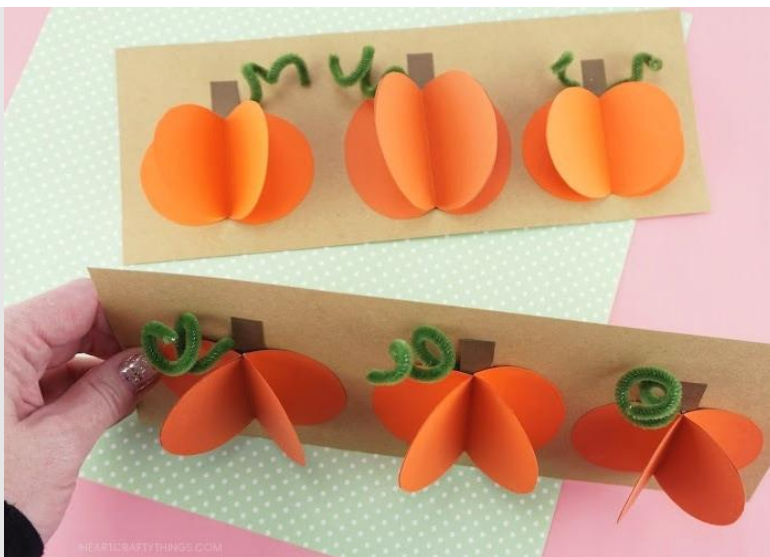

5. Make pumpkin stems and glue on pumpkins

Cut a small rectangle piece of brown construction paper for a pumpkin stem. Turn your 3D pumpkin face down and glue the stem on the back seam of the pumpkin.

6. Create curly pumpkin vines and attach them to pumpkins

Cut a green pipe cleaner in pieces. Curl one end around your finger several times to create a curly pumpkin vine. Attach the pipe cleaner vine to the back of the pumpkin with a piece of tape.

7. Glue 3D pumpkins onto cardstock

Cut a sheet of kraft cardstock in half to glue your pumpkins onto. Add a generous amount of glue stick on the back of each 3D pumpkin and glue it onto the cardstock in a line.

For our craft we used three paper pumpkins. If you create more, you can use a larger piece of cardstock paper to fit them all on. You could also attach one to the front of a folded card.
