

How to Make an Apple Paper Chain

Supplies needed to make an apple paper chain:

- Red [construction paper](#) (Green or yellow would work too!)
- Pencil
- Scissors

How to make an apple paper chain:

Step 1: Fold a piece of red construction paper in half.

Start by folding a piece of red construction paper in half longways. Cut the paper in half. To make this apple paper chain you will only be using one half of the piece of paper. If you would like the chain to be longer, you can use the other half of the paper to make a second apple paper chain and then attach them together.

For my example below, I used a 9×12 inch piece of construction paper. However, you can use any size paper you have around as long as the strip of paper ends up being a long rectangle.

Step 2: Fold the paper in half three times.

Fold the paper in half. Next, fold it in half a second time, Fold it again once more for a total of three folds.

Step 3: Unfold the of paper and then refold it again accordion style.

Next, unfold the strip of paper. Fold it again, but this time fold it accordion style. This means that you should fold one section in, turn the paper over and then fold the next section in. Repeat this step until the entire strip of paper is refolded.

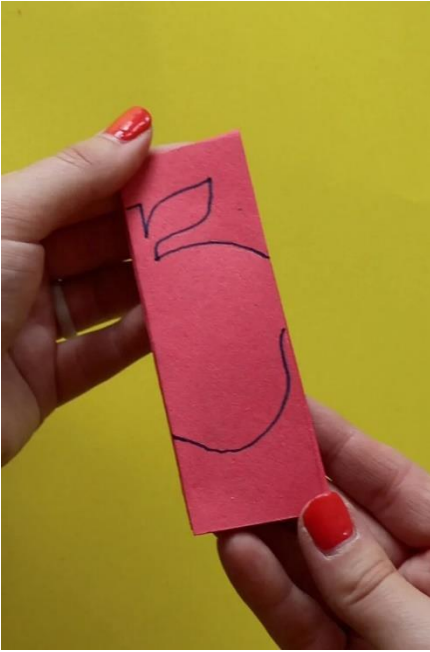

Important note: After you have finished folding, make sure that the right side of the top fold opens up just like you are opening a book. The left side of the paper will be the folded side. The left side side should not open. This will make ensure that all of the apples connect to each other.

Step 4: Draw half of the apple shape.

Next, is to draw half of an apple shape. You can follow the sample apple shape shown in the photo below.

Make sure that the right side of the apple goes off the side of the page a little bit. Doing this will make sure that the apples will connect to each other when the paper chain is opened.

Step 5: Cut out apple and unfold.

Cut out the outline of the apple and unfold the paper to reveal your apple paper chain!

The chain will make four connected apples. If you would like to make a longer paper chain, you can repeat this process and then connect all of the chains together.
